

Citibank[®] Online Investments

Citi's award-winning online investment portal integrates investment activity with your global cash management operations.

Citibank Online Investments is a global, secure, Web-based investment system offering a wide variety of short-term investment choices depending on the location of your account. Available via single sign-on through CitiDirect[®] Online banking and TreasuryVision[®], you can go online to view rates, initiate trades and receive immediate confirmation or view this information later through the trade inquiry screen. You can also add new funds to your portfolio in real time. With Citibank Online Investments, streamlining your investments just got easier.

Choice of diverse investments

Citibank Online Investments offers fixed maturity and pooled investments, consisting of most of the instruments treasurers use for managing short-term liquidity. With such product breadth you can consolidate your investments in one location for more active management of your money.

Convenience

By directly linking to your Citibank operating account, Citibank Online Investments eliminates the need for separate wire transfers and custodial services, providing an efficient and cost-effective trading environment while simultaneously reducing opportunity for errors.

Visibility

Citi's global platform allows clients to view reports and transact for multiple legal entities all from one application. You can create an ad hoc trade inquiry report with a customizable date range, produce an open contract report for fixed maturity options or generate an account position report for balanced based investments. In addition, for offshore money market funds, you can consolidate your statements into one base currency for a true apple-to-apple comparison of your positions.

Global reach

Citibank Online Investments can be linked to accounts in 18 countries with a range of investment options including term products, money market deposit accounts and money market funds both domestic and offshore.

Transaction security

Utilizing leading-edge technology through CitiDirect Online Banking and TreasuryVision, Citibank Online Investments offers a convenient and secure way to invest. You can also choose to implement maker/checker trade execution including trigger points and two levels of approvers in order to control the investment process.

Other options

Citibank Online Investments is one of several channels Global Transaction Services makes available for managing your investments. Depending on your needs and how you prefer to invest, you may want to ask your sales representative about active investing via our Liquidity and Investments Desk, or automated investing using overnight investment sweeps integrated with liquidity solutions.

For more information about Citibank Online Investments, contact your Citi representative.

An investment in a money market portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although a money market portfolio seeks to preserve the value of an investment at \$1.00 per share, it is possible to lose money by investing in a money market portfolio.

Investors should consider a fund's objectives, risks, and charges and expenses, and read the prospectus carefully before investing or sending money. The prospectus contains this and other information about the Funds.
